BioCleaner

Theia offers a range of products for eliminating oil and grease as well as odors and BOD in collection systems.

The Natural Solution

Theia offers a unique technology for mitigating or eliminating oil and grease at lift stations as well as in tanks and headworks. The technology uses an endless supply of bacteria instead of nasty chemicals.

Unlike chemicals, this system is completely natural and does not interrupt or harm your process and will not interfere with the bacteria at the plant.

Unlike powdered or liquid bacteria, you buy it once and it lasts for ten years or more. The bacteria are very efficient but are designed for a specific environment and will not interrupt the natural biomass at your treatment plant.

Will Eliminate/Mitigate:

BOD/COD
Oil & Grease
Odor
